

Important

- Please unwrap the basin and check it carefully to ensure it has not been damaged in handling or transport.
- Please check that all parts have been supplied.
- Assemble basin on a mat to protect against damage to basin surface.
- Store the basin in a safe place until you begin installation to avoid damage.
- Any installation should be carried out by a qualified tradesman with knowledge of statutory plumbing requirements in your area.
- This installation guide does not include details of waste connection; final decision about installation of waste connection should be taken by a suitably qualified person.

Care and Maintenance

Repairing a scratch: If any scratches occur during installation these can be removed by rubbing with a 800 sand paper , gently sand the area without water. For best results limit sanding to the smallest possible area around the scratch.

Everyday cleaning

We recommend a non-abrasive bathroom cleaner.

Warning

Never use cleaners / bleach products specifically manufactured for WC bowl cleaning as they may damage your basin. In addition to these we strongly recommend that applying hair colouring is also not used over the basin as it may de-colour the basin.

Please place your product identification number here and keep this paperwork in a safe place as you will need this if a problem occurs with your product.
